

COM3001 PROFESSIONAL PROJECT

Feedback Form (6842754)

1. Context (20%)

Band: 30-39 BELOW EXPECTATIONS (Fail)

Feedback:

The problem is not presented well, as both the abstract and introduction are too short and underdeveloped. While the topic of machine unlearning and its relevance are mentioned, the discussion lacks depth and clarity. There is no clear statement of what was actually done, aims and objectives are missing, and the contribution and limitations are not articulated.

The literature review shows reasonable breadth and includes relevant and up-to-date areas. However, it is largely descriptive and lacks critical evaluation. Each piece of related work should be presented as a short paragraph including a brief summary followed by clear criticism or limitations. No equations are required in this section. Titles of papers should not be included in the running text.

2. Methodology and Implementation (40%)

Band: 0-9 VERY FAR BELOW EXPECTATIONS (Fail)

Feedback:

All core chapters relevant to this section (requirements, design, implementation, and evaluation) are essentially empty or placeholders. There is no defined methodology, no requirements analysis, no system or experimental design, and no implementation or results.

As a consequence, there is no technical contribution, no evidence of applied knowledge, and nothing that could be reproduced or evaluated.

3. Evaluation and Critical Review (20%)

Band: 0-9 VERY FAR BELOW EXPECTATIONS (Fail)

Feedback:

This section is missing. There is no evaluation presented, no results, and no comparison with related work. There is no evidence of analysis, interpretation, or understanding of outcomes.

4. Presentation (Report and Video) (10%)

Band: 0-9 VERY FAR BELOW EXPECTATIONS (Fail)

Feedback:

The report contains very limited content, with most sections empty. As a result, the writing cannot be considered clear or complete, and the technical material is not properly explained.

No video presentation was found, which is a required component.

5. LESP (10%)

Band: 20-29 WELL BELOW EXPECTATIONS (Fail)

Feedback:

Although the ethics form has been submitted, there is no content in the report addressing legal, social, ethical, or professional issues.

6. Final Mark

Final Mark: 16

Overall Feedback (Optional):

The project falls in a very low band due to major incompleteness. The topic is relevant and there is some evidence of background reading; however, key components are missing: no clear aims, no methodology, no implementation, and no evaluation. Several core chapters are empty, and no technical contribution is demonstrated. The video is also missing.

Overall, the submission does not meet the core expectations of a final-year project.
